

When you consider all the

bad things that can happen...

to circuit boards...

it's a wonder how some of them survive at all!

They get struck, cracked, twisted, scratched, static shocked, overheated. Conductors get ripped up, pins get bent. Others become the victim of changed specifications.

Solution:

Who we are...

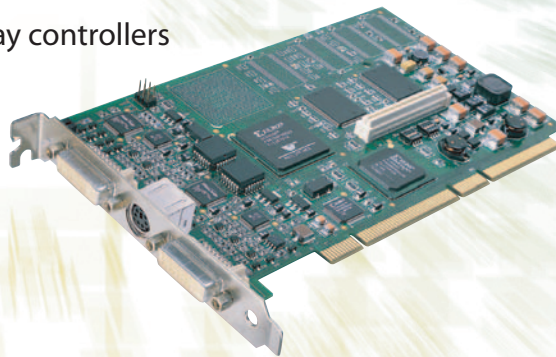

- Virtech™ Services is a company specializing in the repair of video display boards
- Electronic technicians with more than 8 years' experience
- Specialists in the repair of DOME display controllers

What we do...

- Repair analog and digital display controllers
- Conduct failure analysis
- Quality control testing

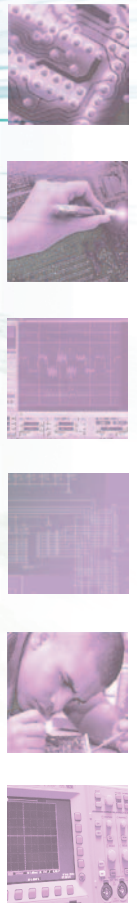

What we guarantee...

- Fast turnaround
- Reliable service
- Your satisfaction

After you've invested in high-end quality display boards, let us help by giving you a lifeline to the repair of damaged or out-of-warranty controllers. You can count on our reliable analysis.
